NEWS RELEASE

November 14, 2005

SFR: TSX-V

**STARFIRE SUMMARIZES 2005 EXPLORATION PROGRAM
AND PROPOSES AGGRESSIVE BUDGET FOR 2006**

Starfire Minerals Inc. (SFR: TSX-V) announces final results of its successful exploration program on the Capri property located 140 km north of Ottawa. Encouraging results from the \$600,000 2005 program have Starfire management proposing a 2.5 million dollar budget for an aggressive follow up program. Starfire proposes a phased 13,000 m drill program in 2006 on three mineralized zones. To date exploration indicates that near surface mineralization is found at several locations that have been the subject of past and present exploration. To ensure the best targets are being pursued, an airborne survey of the entire property and newly acquired adjacent claim blocks, is being proposed, as most of the property has not been explored. The company is optimistic that the proposed 2006 program will delineate several Uranium resources amenable to open pit mining.

During the 2005 fieldwork season on the Capri property's grid I, II, and III Starfire completed; 62 km of line cutting, ground radiometric surveys, mapping, stripping, surface trenching and sampling. Seventeen Hundred Meters (1,700 m) of drilling, in 21 holes on grid I, was also completed as shown in Table 1.

Capri Property 2006

Starfire proposes a two-phase program to be implemented following an airborne radiometric survey and prospecting of the whole Capri property. Follow-up sampling and trenching shall be carried out on the new discoveries prior to drilling on the property.

Phase I: On Grid I a 2,000 m drilling program, on zones II and IV, is being proposed to define a mineralized resource; On Grid II, further line cutting, stripping and channel sampling are necessary to further define mineralized targets; On Grid III, further stripping and sampling will allow to quickly detail already known mineralized targets. A 1,000 m drill program will likely permit a preliminary resource calculation.

Phase II: Following positive Phase I results, a 10,000 m drill program is proposed on the three grids and a further advanced resource calculation will be performed. **Table 1** shows the preliminary budget for the Capri property for the 2006 fieldwork season.

Table 1: Proposed Budget for Capri Uranium Property 2006

CAPRI PROPERTY 2006 - PHASE I		
ACTIVITY	RATE	ESTIMATED COST
Airborne Radiometric Survey		\$60,000
Geology and Prospecting on Capri property		\$50,000
Grid I		
Drilling Zones (2 & 4)	2,000m @ \$100/m	\$200,000
Grid II		
Line cutting		\$5,000
Stripping		\$20,000
Ground Radiometric		\$5,000
Trenching & Sampling		\$10,000
Grid III		
Line cutting		\$5,000
Stripping and Sampling		\$10,000
Ground Radiometric		\$5,000
Drilling	1,000m @ \$100/m	\$100,000
Geological Crews	5-man crew @ \$3,000/day	\$180,000
	Subtotal	\$650,000
Contingency	15%	\$97,500
Management Fees	10%	\$74,750
	Total	\$822,250
CAPRI PROPERTY 2006 - PHASE II		
ACTIVITY	RATE	ESTIMATED COST
Grid I		
Drilling	5,000m @ \$100/m	\$500,000
	Drilling rate=70m/day	
Grid II		
Drilling	1,000m @ \$100/m	\$100,000
Grid III		
Drilling	4,000m @ \$100/m	\$400,000
Geological Crews	5-man crew @ \$3,000/day	\$430,000
	Subtotal	\$1,430,000
Contingency	15%	\$214,500
Management Fees	10%	\$164,450
	Total	\$1,808,950

The budget is conditional to successful financings.

2005 Drill Program Results:

The results from the 2005 drill program are presented in **Table 2** below. The results show several intersections near 0.5 pound (229gms) per tonne, which is the company's target grade for defining a resource. The drilling and sampling to date suggests that more drilling is necessary before a resource calculation can be carried out.

Several noteworthy drill core intervals returned encouraging results: Z4-05 DDH 01 between 66.4m and 75.8m returned **(178gm/9.4m)**; Z4-05 DDH 04; between 10 and 17.6m returned **(205gm/7.6m)** & between 49m and 55.9m returned **(181gm/5.7m)**; Z4-05 DDH 06: between 57.3 and 73m returned **(187gm/16.5m)**; Ram05 DDH-05; between 31.5m and 37m returned **(219gm/5.5m)**.). The above noted sections are 'weighted averages' and are not true widths.

Table 2: Results of Drilling on Grid 1, Zone II (Ramy) and Zone 1V:
