NEWS RELEASE

STARFIRE MINERALS RECEIVES ASSAY RESULTS FROM CROSS STRUCTURE PROPERTY

Starfire Minerals Inc. (TSXV: SFR) has received the assay results from September fieldwork on its Cross Structure Property. The Cross Structure Property is located 5km east of Havre St. Pierre, Quebec and is accessed by vehicle. Numerous companies are presently exploring for both uranium and platinum group elements in the area surrounding the Cross Structure Property. The assay results include nine saw cut channel samples over widths from one to three metres that returned gold values ranging from 0.19 to 0.62 grams / tonne and consistent uranium values from 35-190 ppm U3O8. The samples were taken from 3 outcrop exposures over a distance of about 1.5 km that are part of a continuous northeast-trending pegmatite structure showing an estimated width of about 10 m. Samples were tested at *SGS Lakefield Laboratories* in Ontario.

The results indicate that all nine samples show anomalous uranium and unexpected gold values with some areas averaging 0.5 gram per tonne. The pulps, of the higher gold value samples listed below, are being sent to an alternate lab for verification.

Table 1: Assay results from Cross-Structure Property, Quebec

| No | East | North | Length | Counts Per Second | Uranium(ppm) | Thorium(ppm) | Gold(gm) |
|-----|--------|---------|--------|-------------------|--------------|--------------|----------|
| L6 | 544185 | 5572038 | 1.2m | 7400 @t 1m | 190 | 790 | 0.44 |
| L7 | 544188 | 5572055 | 1m | 11000 @t 0.6m | 140 | 610 | 0.47 |
| L8 | 544242 | 5572107 | 0.9m | 3400 @t 0.7m | 68 | 390 | 0.21 |

An airborne geophysical survey is underway on the property and will be completed in about 5 days. Interpretation of the results will follow and additional field checking will be conducted weather permitting.

This press release was reviewed and verified by A. Ciesielski, DSc., P.Geo., the qualified person (QP) experienced in uranium exploration. A. Ciesielski is also currently working on the 43-101 report.

Starfire Minerals Inc. is an exploration company with 3 uranium properties, 2 in Quebec, 1 in Ontario, in addition to several precious and base metal properties near Timmins, Ontario.

ON BEHALF OF THE BOARD OF DIRECTORS OF

STARFIRE MINERALS INC.
